

Light Positive Announces Supplier Diversity Office of Massachusetts Certification as Woman-Owned Business Enterprise (WBE)

Light Positive is proud to announce our recent formal certification from the Supplier Diversity Office of Massachusetts as a Woman-Owned Business Enterprise (WBE).

This certification enhances our ability to bid on business in the Massachusetts public sector and on other government projects/contracts. The Commonwealth of Massachusetts spends more than \$4 billion each year doing business with local firms, more than \$240 million of this amount is targeted to SDO certified businesses owned and operated by minorities and women.

Adding Light Positive to a bidding design team can facilitate participation in Massachusetts' business and economic development opportunities. To learn more about an SDO certification, [click here](#).

We look forward to speaking with potential partners about this certification and the opportunities presented by projects in this market.
